

Intro Software Engineering Problem Set 2: Exceptions and Data Abstraction

- Exercise 4.1 from the text. Your solution should be in the form of a well-documented and compileable `.java` file.
- Exercise 5.3. Do not worry about being able to compile your implementation — just write the specifications and implement the methods asked for.
- Exercise 5.7. This should be a compileable public Java class.
- Exercise 5.15. There is no implementation for this one.

Submit your work by copying a single tar or zip file into the dropoff folder before 4 a.m. on Thursday, April 17. The file you submit should have a name that includes your username and the digits “02” as nonoverlapping substrings.
